

Kahlenberg Ship Bells

SOUND SIGNALING EQUIPMENT

Ship Bells

Kahlenberg Ship's Bells are manufactured of cast bell bronze alloy, developed specifically for superior tonal quality and resonant characteristics.

BE/36261 : 8" Ship's Bell

BE/36260 : 12" Ship's Bell without bracket

BE/36265 : 12" Ship's Bell with bracket

BE/36148 : 16" Ship's Bell

5

International Maritime Organization (IMO) Regulations, ('72 Colregs), require Ship's Bells for vessels over 12 meters in length. Kahlenberg 8" Bells satisfy this requirement for vessels 12 to 20 meters, while Kahlenberg 12" and 16" Bells meet these regulations for vessels over 20 meters in length.

BE/36260 "Classic" 12" Ship's Bell

- ✦ Available sizes include 8", 12" and 16" diameters as measured across the mouth of the bell. All 8" and 12" bell designs are available with optional bulkhead mount bracket assemblies.
- ✦ Options include the acid etching or engraving of the vessel name and/or logo, and launch date in the bell. A proof of the placement and design of complicated graphics is supplied to the customer for approval prior to production.
- ✦ A variety of surface finishes are offered for all sizes of bells, including a satin or buffed mirror finish, and award winning decorative chrome plating of the highest quality.
